Quantities of Certain Articles Manufactured and Mined.

The following statistics of production are obtained principally by means of returns collected from producers monthly. Annual totals for 1955-56 and earlier years are derived principally from annual factory returns (relating in most instances to the year ended 30th June).

Particulars in this table have been revised since last issue on the basis of the annual factory returns for 1955-56. Monthly figures from July, 1956 are still subject to revision.

No. 43.—Retail Trade—Total Value of Sales in New South Wales.

(Adjusted on a basis comparable with the 1952-53 Retail Census.)

Statistics for 1948-49 and 1952-53 were compiled from returns supplied by each retail establishment in the State, but statistics for later years are estimates based on returns collected from a representative sample of retail establishments.

Particulars in Table 43 relate to the retail sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards), and include the retail sales of establishments principally engaged in wholesale, manufacturing, or servicing activities.

No. 86.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business in New South Wales is extensive.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Minor revisions were made in the composition of the index in August, 1956.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	4 Pastoral and Finance Companies.	4 Insurance Companies.	Total 75 Companies.	34 Active Shares included in foregoing.

Governmental and Private.

(1) Particulars in Tables 92 and 93 are estimates based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943 and Occupation Survey, 1945), and returns supplied monthly by governmental authorities and, since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax.

(2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month, irrespective of whether they were actually working at the end of the month.

(3) Working proprietors, wage earners in rural industry, females in private domestic service, members of full-time defence forces at home or abroad, National Service Trainees in camp, and Government "relief" workers are not included.

No. 94.—Employment in Larger Private Factories, New South Wales.

In order to provide a prompt indication of the trend of employment in private factories, a survey of employment in 623 larger privately-owned factories in New South Wales is made each month, by joint arrangement between the Secretary of the Department of Labour and National Service and the Commonwealth Statistician. Approximately half of total factory employment is covered by the collection, the results of which are available one month earlier than the particulars of total factory employment shown in Table 92.

No. 97.—Export Price Index Numbers—Australia.

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals, and for wheat (from July, 1945 to September, 1951), the index of prices is deduced from the average value of current sales or shipments and hence shows some irregularity. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100.)

(a) From October, 1951 to July, 1953, the prices used for wheat are the estimated average realizations after weighting prices of quota and non-quota wheat. Prices adopted for months since August, 1953 are derived from available information of current sales. (b) Non-ferrous—Silver, Copper, Tin, Zinc, Lead. (c) Beef, Lamb, Mutton, Pork. (d) Where Australian gold has been sold on the overseas premium markets, such price has been used in the index. (e) Including, in addition to groups shown, Sugar, Dried Fruits, Tallow, and Hides (proportionate weight, 5.51 per cent.). (f) Percentage distribution of base aggregate for "All Groups". (g) Nominal. (h) Preliminary.

No. 98.—Wholesale Price (Basic Materials and Foodstuffs) Index Numbers.

The eighty commodities included in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.
